PROFESSIONAL SUMMARY

An MBA/MSDS candidate experienced in statistical modeling, visualization, and reproducible analytics using Python, SQL,R, who loves learning modern data tools to produce clear visualizations, documentation, and demos that support data-driven product decisions and real world big picture use.

EDUCATION

MBA/MSDS | *Willamette University* | Salem OR 2024-2026

Bachelor in Computer Science, Minors: Visual Arts and Psychological Education | *The College of Idaho, Caldwell, ID* 2020-2024

RELEVANT SKILLS

language Skills :Arabic (Fluent), English (Professional), German (Professional)	Data Management SQL for Large-Scale Data Analysis and Databases	Data Analysis & Modeling Python, R, SQL, Exploratory Data Analysis (EDA), Statistical Modeling, Data Cleaning, Data Transformation
Data & Analytics Tools Jupyter Notebook, RStudio, RMarkdown, Google Colab, Git, VS Code.Colab	Data Visualization Tableau, Python, R, Excel	

RELEVANT PROFESSIONAL EXPERIENCE:

Tech Safety Student Experience Intern, College of Idaho | Caldwell, ID Sept/2023 -Dec2023

- Evaluated newly introduced student success tools to determine which features were effective and which created usability barriers. Tested the platform, analyzed qualitative user feedback and quantitative usage trends, and documented findings with clear recommendations to guide administrators and product teams in refining features and planning future program improvements, resulting in a 68% increase in platform engagement.
- Developed awareness campaigns and led cybersecurity training sessions to improve student understanding of digital safety and promote responsible technology use across campus.
- Provided weekend IT help desk support, assisting students with software access, device troubleshooting, and account issues to ensure reliable use of campus technology systems.

PROJECTS:

Mental & Overall Health Predictive Modeling (Python) | Willamette University Sept/2025-Dec/2025

- Analyzed a 3,000+ response wellness survey to identify predictors of mental and physical health outcomes. I cleaned and structured messy real-world data and applied correlation analysis, demographic segmentation, heat maps, and regression modeling to uncover key patterns. Developed clear visualizations and reports that translated complex results into insights for decision-makers, revealing strong links between declining mental and physical health among adults aged 56+ and identifying geographic segments with the lowest mental health scores.

Tuition Cost Drivers & Predictive Modeling (R), Willamette University Sept/2025-Dec/2025

- Analyzed multi-year tuition, demographic, and institutional data (2011–2021) to investigate factors contributing to rising college costs. Cleaned, modeled, and visualized the data using statistical analysis to examine relationships between living arrangements and tuition increases, identifying key trends and anomalies across student housing options.
- Produced a reproducible RMarkdown report with visualizations and presented findings to both technical and non-technical audiences, clearly communicating insights and cost patterns. The analysis showed that living costs increased steadily each year and that students living off-campus with family could save approximately \$13,000 annually compared to on-campus housing.

Sarah Alhusaynat

(208) 565-0243 | SAALHUSAYNAT@WILLAMETTE.EDU | [www.linkedin.com/in/sarah-alhusaynat]

Peer Health Advocate | The College of Idaho | Aug 2021 – Sep 2023

- Led student advocacy programs focusing on well-being, accessibility, and support services.
- Provided guidance on student accommodations and resources, ensuring accessibility for all students.
- Maintained confidentiality and handled sensitive information with professionalism, operating emergency 24/7 phone and front desk office support.

Testing center proctor and operator | The College of Idaho | Aug 2021 – Sep 2023

- Incorporated accommodations coordination, inclusion strategies and self-care strategies at the testing center, ensured students are taken care of during examination periods.
- Proctored students at exam periods, kept a strict time schedule and operation efficiency. Ensured exams were completed with students being comfortable and cared for.
- participated in monthly meetings with the care and testing center committees and delivered reports at improving the quality of environment and testing procedures.

Treasurer – Atkinson Marketing Association (AMA) | Willamette University | Oct 2024 – Present

- Assisted in event planning and financial allocations for student programs. Delivered at a timely manner and ensured events ran smoothly.
- Promoted events through social media and digital marketing increasing engagement, transparency and visibility to students.

Communication Chair – Technology Business Association (BTA) | Willamette University | Oct 2024 – Present

- Managed social media presence and engagement strategies.
- Enhanced digital outreach, increasing student participation.

Art Club president | The College of Idaho | Aug 2022 – Sep 2023

- Led and organized weekly Art Club meetings, fostering a collaborative, stress-free and safe space for students to explore creative projects and artistic techniques.
- Managed communication and planning for club activities, ensuring smooth coordination between members and campus resources as well as bi-weekly club meetings.
- Oversaw event logistics and scheduling, strengthening my leadership, organization, and team collaboration skills. Coordinated art events and workshops that encouraged student participation and creative expression across campus. Encouraged participation and use of space to exhibit their works.
- Promoted an inclusive environment where students of different skill levels and backgrounds could engage with art and creativity. Participate in bi-Monthly workshops hosted with the help of Art major students and professor ex, clay making workshop.
